21	22	23	24	25					

TABLE:

NAME: \_\_\_\_\_

1. *In what <b>hair dyeing technique</b> is dye painted onto the hair by hand to create soft and natural highlights?	
2. The southernmost point on the Arabian peninsula lies in which <b>country</b> ?	
3. In 2023, <i>Succession</i> creator Jesse Armstrong confirmed that the series's patriarch, Logan Cox, was based on which <b>Australian media mogul</b> ? He is associated with News Corporation, the Fox family of networks, and Sky Group International.	
4. German-British sociologist Ruth Glass coined what now-common <b>term</b> in 1964 to describe a process whereby middle-class people had moved to traditionally working-class areas of London, displacing the previous residents, and changing the character of the neighbourhoods?	
5. A 1965 essay by British art critic Richard Wollheim is often credited with coining which term for <b>art, music, and design movements</b> that eschew ornamentation and may use as little as possible in terms of materials? The term has been used to describe the artistic works of people like Donald Judd, Carmen Herrera, and Steve Reich.	
6. *Here we see which type of <b>light infantry</b> , often used as skirmisher in Hellenistic armies? They were named after the kind of crescent-shaped shield that they carried.	
7. According to the local myth, the twins Wars and Sawa were the legendary founders of which <b>European city</b> ?	
8. The largest company in Spain by market capitalization is Amancio Ortega's Inditex, which is most known for running which <b>fast-fashion retail chain</b> ?	
9. *In this medieval themed anime series, based on a manga by Nakaba Suzuki, we follow a band of knights in the kingdom of Britannia. The title, both of the group of knights and the anime, is a well-known concept in Christian theology. Give the <b>name of the series</b> .	
10. In astronomy, what <u>eponymous name</u> is given to the <b>points in space</b> where the gravitational pull of two large masses precisely equals the centripetal force required for a small object to move with them? Spacecraft use these regions to reduce fuel expenditure.	
11. A real box office failure, but then a cult classic – in which <b>1989 film</b> did Nicolas Cage eat a live cockroach? The original script said a raw egg, but Cage meant that a cockroach would be more shocking to the audience.	
12. Holger Rune, Casper Ruud and Jannik Sinner are three of the current top ten on the men's rankings in which <b>sport</b> ?	
13. Which <b>city</b> in the state of Guerrero was the first major resort community in Mexico? During the Spanish colonial era, it was important as a point of departure for ships to China and the Philippines.	
14. The Belgian research base Princess Elisabeth Station, built against a ridge exposed to winds of up to 300 kilometres per hour, is the only zero-emission base on which <b>continent</b> ?	
15. If you would do the whole trip with the passenger train "The Canadian", you would travel from Toronto and then 4466 km westwards to which <b>city</b> , the most populous in British Columbia?	
16. *Which <b>Pokémon</b> is shown here?	

17. In auto racing, which term (which, appropriately, appears in the subtitle of one of the Fast and the Furious films) names a <b>driving technique</b> in which the driver intentionally oversteers in order to drive sideways through corners?	
18. The 800y Blue Military, the Inverted Jenny and the Hawaiian Missionaries are considered extremely rare and are very much wanted by collectors. <b>What</b> are we talking about here?	
19. This film studio's enduring symbol allegedly came from a sketch on a scrap of paper by "the Man Who Invented Hollywood", W. W. Hodkinson. The 2961 metre high Ben Lomond in Utah is sometimes thought to be the inspiration for his sketch. The number of stars has varied throughout the years: Initially they reflected the number of actors tied to the studio, later they corresponded with the number of letters in the company's name. Which <b>film studio's</b> logo is this?	
20. According to the definition as it is articulated by the US Department of Treasury, this is «the process of making illegally-gained proceeds (i.e., 'dirty money') appear legal (i.e., 'clean').» Which <b>criminal activity</b> or process?	
21. *These detailed and illustrated manuscripts were a popular source of information on animals in the Middle Ages. And presenting real and legendary animals as allegories, they are also useful for understanding the symbolic language of animals in Western Christian art. What is the name of these <b>manuscripts</b> ?	
22. Which <b>musician</b> absolutely despised the Clash's cover of his signature song, "Police and Thieves," denouncing it by saying "They have destroyed Jah work!"?	
23. Nicknamed "The Wind Classic" and "The Echelon Race", which one-day <b>road cycling race</b> and one of the "cobbled classics" is held in late March, on the last Sunday before the Tour of Flanders? The most recent winner of the race is Christophe Laporte.	
24. During heavy exercise, glucose within muscles is broken down anaerobically, leading to pyruvic acid which breaks down further into what <b>compound</b> ? Buildup of this compound within muscles is thought to be the main cause of muscle fatigue and cramps during exercise.	
25. The <i>Epic of Sundiata</i> tells the story of Sundiata Keita, the founder of which <b>African empire</b> ? The empire, existing from c. 1226 to 1670, shares its name with a modern-day country.
